

# CELEBRATING 26 YEARS

## ROBOTICS STUDENT TESTIMONIAL:

“The Eagle Fund provided us with an incredible opportunity to test our ideas, meet other young engineers, and improve our understanding of robotics. Not only did competitions give our team an opportunity to see our robot in action, but they also allowed us to see where we could improve. To me, that’s the most essential component of engineering – problem solving and improvement. The Eagle Fund has enabled us to further explore the world of engineering and bring our team to the next level.”

## Helping Students **SOAR!**

The EAGLE FUND just celebrated 26 years! During those years, the fund has awarded over \$600,000 in grants for projects initiated by students, faculty and community members in the Southern Berkshire Regional School District (SBRSD). Funded projects include a wide array of innovative and unique academic experiences including Robotics, FFA Convention Trip, 8th grade field trips, Greenagers, band field trips, the Senior Citizen Luncheon and more! To learn more visit [www.eagle-fund.net](http://www.eagle-fund.net).

The EAGLE FUND is not affiliated with the Southern Berkshire Regional School District. It is an endowed fund, managed by the Berkshire Taconic Community Foundation, which relies on donations to provide innovative programming for SBRSD students. To all that have supported the Fund in the past, you have made a difference in the lives of many students. Please join us in celebrating 26 years by considering a donation to ensure the EAGLE FUND’s continued support of our children. THANK YOU!
